EDUCATION

ATENEO DE DAVAO UNIVERSITY

Master in Information Technology (MIT)

Davao City
2026 - Present

Graduate studies focused on advanced information technology, software systems, and applied technology.

UNIVERSITY OF MINDANAO

Bachelor of Science in Information Technology

Davao City
Magna Cum Laude

Academic Distinction: Magna Cum Laude · Loyalty Award

Areas of Study: Web Development, Mobile Application Development, Database Systems, Software Development

WORK EXPERIENCE

UNIVERSITY OF MINDANAO

IT Educator

Davao City
Present

- Teach web development, mobile application development, and database design, management, and implementation through lecture and laboratory sessions.
- Develop lectures, laboratory activities, exercises, project specifications, rubrics, and technical assessments aligned with course learning outcomes.
- Guide students through programming and software development projects, strengthening problem-solving, debugging, and implementation skills.
- Demonstrate practical development using PHP/Laravel, MySQL, HTML/CSS/JavaScript, Flutter/Dart, Firebase/Firestore, and related development tools.

AQUILLA SOFTWARE

Software Development Intern

3-Month Internship

- Contributed to the development of a Doctor-Patient Management System designed to organize and support doctor-patient processes within a centralized application.
- Translated project requirements into working software features and participated in improving system functionality.
- Applied software development concepts in a real-world project while gaining experience in a professional development environment.

PROJECTS

MESSAGEEASE

Mobile Booking Application

- Worked on backend and database implementation for a cross-platform message booking application using Supabase.
- Supported location-based functionality through Google Maps API integration and matching logic based on the Gale-Shapley algorithm.

EVENTHUB

Web-Based Event Management Platform

- Contributed to front-end development using ASP.NET, HTML, CSS, and JavaScript for an event management platform.
- The platform was used by organizers of open-market events to support event coordination and operational workflows.

BOARDING HOUSE FINDER

System Proposal

- Designed a boarding-house marketplace concept intended to create a direct line of communication between tenants and property owners.
- Developed the system model around users, boarding houses, rooms, listings, photos, and amenities, with proposed owner subscriptions and booking transactions.

ACTIVITIES

DTI x GOOGLE CAREER CERTIFICATION PROGRAM

Scholarship Recipient

Philippines
2026

- Selected for the DTI x Google Career Certification scholarship program for continued professional and technical development.
